Abstract (en)  
[origin: WO2020260796A1] Turbomachine output bearing support (10) extending in an axial direction (X), said support (10) being formed in a single part and comprising an annular inner wall (12) and having an inner side (CI) and an outer side (CE), an annular outer wall (14) arranged on the outer side (CE) of the inner wall (12), and a twist support (16), the inner wall (12) comprising a first portion (12A) having a first shape that is essentially frustoconical and extends in the axial direction (X) and has the inner side (CI) and the outer side (CE), the first portion (12A) having a first axial end (12A1) provided with a first attachment flange (18) and a second axial end (12A2) that is opposite in the axial direction (X) from the first axial end (12A1), provided with a bearing support portion (20), the first portion (12A) having, on the inner side (CI), an inner portion (22) forming a second attachment flange, the twist support (16) being borne by the inner wall (12A) on the outer side (CE).
