Abstract (en)

[origin: WO2020260674A1] The invention relates to a device for monitoring shielded DC power cables comprising a first circuit, a second circuit, a measuring device for measuring a parameter of the first circuit, and a measuring device for measuring a parameter of the second circuit, wherein the shielded DC power cable to be monitored is part of the first and part of the second circuit. The invention also relates to a corresponding method for monitoring DC power cables.
