Abstract (en)

[origin: WO2021005475A1] A method for the production of ceramic products (2) comprising: a compacting step, in which a powder material (5) is compacted; a supplying step, in which a first ceramic powder (7) is fed to a first conveyor assembly (10) so as to determine a base layer (13); a removal step, in which a removal device (16) removes part of the first ceramic powder (7) so as to obtain a groove (17) in the base layer (13); a deposition step, in which a delivering device (20) deposits, into the groove (17), a second ceramic powder (8), different from the first ceramic powder (7), for a combined layer; a feeding step, during which the combined layer is fed downwards crosswise to the conveying direction (D), by means of the feeding assembly (21), to a second conveyor assembly (25).
