Abstract (en)

[origin: WO2021089289A2] The invention relates to a sheet processing machine (01) having at least one sensor device (251), wherein the at least one sensor device (251) comprises at least two sensors (252), wherein the at least two sensors (252) are in the form of a camera (252), wherein the sheet processing machine (01) has at least one feed system (202), wherein the at least one sensor device (251) is designed to control and/or regulate at least one actuator (218; 231; 237) of the feed system (202) on the basis of the capturing of at least one sheet (02) of sheets (02) by the at least two sensors (252), wherein the at least two sensors (252) are designed to selectively capture at least one edge (07; 08; 09) and/or print mark (11) of sheets (02). The invention likewise relates to a method for controlling and/or regulating at least one part of a sheet processing machine (01).
