Abstract (en)
[origin: WO2021005266A1] The present invention concerns a resin composition comprising a resin containing a condensate of formaldehyde, lignin-comprising phenolic component and protein isolated from cereal grains and a process for the production of such composition, as well as end- uses of the resin composition. In particular, the present invention relates to a resin composition having especially low free formaldehyde concentration and to a process for the production of such composition.
