Abstract (en)
[origin: WO2021001555A1] A luminaire head assembly comprising: a body provided with a through-hole between an upper side and a lower side; an upper cover to cover said upper side; a hinge between said upper cover and said body; a photometric unit releasably attached to said body, preferably in a tool-less manner, and at least partially extending in said through-hole, said photometric unit comprising an electronic assembly and a light source; a skirt releasably attached to said body and at least partially surrounding said body; and at least one of: a lower cover supported on the lower side of the body and surrounding said through-hole, and a protection and connection assembly comprising a protective casing and a connection part configured for connecting a lower end of the protective casing to a pole, wherein an upper edge of the protective casing is supported on the lower side of the body and surrounding said through-hole.
