Abstract (en)
[origin: WO2021004612A1] A protective apparatus (100) for a multi-node junction (10) for fibre optic cables (20), the multi-node junction having an internal splice organiser (30) for receiving fibre optic cables and having a rigid closure (40) for enclosing the internal splice organiser, the protective apparatus comprising: an adjustable body (110) capable of being manipulated by a user so as to surround the internal splice organiser, wherein the protective apparatus is dimensioned so as to allow the rigid closure to enclose the internal splice organiser and the protective apparatus when the protective apparatus surrounds the internal splice organiser; and a retaining formation (120) for retaining the adjustable body in a form that surrounds the internal splice organiser.
