Abstract (en)
[origin: EP3995051A1] A child carrier adapted to be worn by a wearer for carrying a child, comprising a hip belt (10) adapted to be secured about the waist of the wearer, and a seat part (30) connected to the hip belt (10). The seat part (30) comprises a seating surface (38) adapted to seat the child on, a main pocket (35) located under the seating surface (38), and an inflatable insert (50) deformable between an inflated state and a deflated state. The inflatable insert (50) provides shape to the seat part (30) when inserted into the main pocket (35) and inflated. The main pocket (35) is reversible and configured to form a storage pocket when turned inside out, the storage pocket being configured to store the seat part (30), including the inflatable insert (50) in its deflated state, and the hip belt (10).
