Abstract (en)
[origin: EP3995409A1] A self-standing packaging container capable of achieving both strength and disposability even if the container has a wide mouth is provided. A container according to the present invention includes: a container body (1) that has an opening part (2a) at an upper end of a tubular member (2); an annular member(11) that is bonded to the upper end of the tubular member (2); and a lid member (12) that seals the opening part (2a) to be openable and closable. The container body (1) has a bottom surface member that is bonded to the tubular member (2) at a bottom surface part of the tubular member (2). The tubular member (2) is constituted by a flexible laminated body of three or more layers including a barrier layer and a resin layer. The lid member (12) is coupled to the annular member (11) by any of a hinge, fitting, and a screw to be openable and closable.
