Abstract (en)
The invention relates to a package for items and products suitable for being readily dispensed and/or made usable through openings or similar present on a body of the same package, of an improved type. It comprises a body (20) ending with a plurality of closing flaps (24) wherein on at least one pair of said closing flaps (241-242; 243-247) there is at least one through hole (30) suitable for being engaged by hooks and/or suspension elements for certain positioning of the same package (10). A peculiarity of the invention is that a package for items and products (10) comprises gripping means of the closing flaps (40) associated with at least part of a surrounding (32) of the through hole (30).
