Abstract (en)
[origin: WO2021005239A1] The invention relates to a method for the recovery or enrichment of flavours and/or fragrances from an aroma-laden gas or vapour phase that is produced as a by-product from the thermal treatment of a vegetable or animal foodstuff. The invention also relates to a method for producing an aroma concentrate, an eluate enriched with a flavouring and/or fragrance, or an aroma concentrate and/or fragrance concentrate that can be produced according to the claimed methods, to the use of said type of enriched eluate or said type of aroma concentrate and/or fragrance concentrate as well as products comprising the claimed enriched eluate or the claimed aroma concentrate and/or fragrance concentrate.
