Abstract (en)

[origin: EP3763871A1] Accessory apparatus (50) for feeding sheets of material comprising at least two beams (51) which are fixable, in a mounted configuration, to a numerical control cutting machine (1), wherein in said mounted configuration the beams (51) develop in projection with respect to a frontal portion of said machine (20), said beams (51) supporting, in spaced relation with respect to the frontal portion of the machine (1), at least two pairs of opposite main slots (52) for holding as many transversal support bars (53) intended to support a roll (57) or another supporting element for supporting a sheet (2) of material to be cut.
