Abstract (en)

[origin: WO2021004659A1] The invention relates to a method for the dynamic feeding of shielding gas, comprising feeding a shielding gas (30, 32) to a component (18) in a welding operation, sensing (110) the temperature of a region of the component; and setting (120) a composition of the shielding gas (30) according to the sensed temperature.
