Abstract (en)
[origin: WO2021003505A1] The invention relates to a furniture fitting (4) comprising: a carrier (5) having at least one substantially flat securing surface (5a, 5b) for securing on a furniture part (2a); at least one control part (12) that can be moved relative to the carrier (5); and an adjusting device (9) for adjusting a position of the control part (12) relative to the carrier (5), wherein the adjusting device (9) has at least one actuation element (16) that can be rotated about an axis of rotation (18), wherein the control part (12) can be adjusted relative to the carrier (5) by exerting a torque on the at least one actuation element (16), wherein the axis of rotation (18) of the actuation element (16) encloses an angle (α) of greater than 0° and smaller than 90° to at least one securing surface (5a, 5b) of the carrier (5), and wherein the actuation element (16) is coupled to the control part (12) via an angularly moveable coupling device (20), preferably comprising a ball joint.
