Abstract (en)

[origin: WO2021005092A1] The invention relates to an electromechanical transmission and/or clutch actuator, comprising an electromotor (1) for generating a driving rotational movement of a motor shaft (4), gear elements transmitting the driving rotational movement, and the gear elements being designed in the form of a flexible drive, wherein a driving wheel (3) fastened coaxially to the motor shaft (4) of the electromotor (1) is connected to a driven wheel (7) via a flexible cable.
