Abstract (en)

[origin: WO2021009445A1] The present invention relates to a surfactant composition comprising: a) at least one anionic surfactant, and b) at least one compound chosen from amphoteric surfactants and nonionic surfactants, in which the total active material of the surfactants is between 25 and 70% by weight relative to the total weight of the composition, in which the anionic surfactant ratio is between 0.2 and 0.9, the amphoteric surfactant ratio is between 0.0 and 0.8 and the nonionic surfactant ratio is between 0.0 and 0.8, the ratio being the relationship between the percentage by weight of the active material of the surfactant in the composition and the percentage by weight of the total active material of the surfactants in the composition, the pH of the composition being between 4 and 9, and in which the at least one anionic surfactant is chosen from the group comprising an alkyl sulfoacetate, an isethionate and sodium lauroylsarcosinate. The invention also relates to a cosmetic, dermatological or detergent composition comprising the surfactant composition, and to a combination of a spray-generating device and the surfactant composition or the cosmetic composition, in which the spray-generating device diffuses the cosmetic composition as a spray.
