Abstract (en)

[origin: WO2021008968A1] The invention relates, amongst other things, to a device for pivotably connecting an air-guiding element (16), preferably a rear side-air-guiding element of a driver's cab, to a vehicle (10), preferably a rear wall of the driver's cab of a utility vehicle. The device has a swing hinge (22), which is designed to be fastened on the one hand to the air-guiding element (16) and on the other hand to the vehicle (10). The swing hinge (22) has a locking mechanism (32), which is designed to lock the swing hinge (22) automatically when at least one predetermined pivot position has been reached.
