Abstract (en)
[origin: WO2021009636A2] The invention concerns the field of roof devices for opening roofs. In particular, the invention concerns a roof device comprising sliding roof panels which are configured so as to be movable along a rail system. The invention also concerns an opening roof comprising the movable roof device. The invention also concerns the use of the roof device in a roof. The invention furthermore also concerns a method for opening and closing the roof device.
