Abstract (en)

[origin: WO2021009444A1] The invention relates to an ammunition having reduced sensitivity (100), which comprises an explosive charge (120). The explosive charge has a blind cylindrical bore (130) for receiving at least one primer-ignition device. The ammunition further comprises a stiffening element (140) which is in contact with the inner surface (130b) of the bore (130). The stiffening element is a solid cylinder having a volume corresponding to the volume of the bore.
