Abstract (en)
A picture frame comprises a viewing window side (1) and a frame side (2) with the viewing window side comprising a transparent window (3). There is a interstice between the viewing window and the frame side. A photo or picture can be placed here. The viewing window and frame sides comprise assembly components (5) in order to assemble the viewing window and frame sides together. An assembly component on the frame side comprises a flexible protruding clamping part (51) provided with a clamping section (52) on a side facing the viewing window (3) and the viewing window (3) is provided with a complementary clamping section (31) at an edge of the viewing window (3) with the complementary clamping sections (52, 31) fitting into each other and with, when assembled, the protruding clamping parts (51) on the frame side exert a clamping force (F2) on the viewing window (3) with the direction of the clamping force (F2) being mainly in the flat plane of the viewing window.
