Abstract (en)  
[origin: EP4001086A1] A support system (1) comprises a support element (2) configured to be connected to an anchoring surface (3), a pole (4), a connecting element (5) rotatably engaged at a bottom end of the pole (4), wherein the connecting element (5) is configured to connect, in a removable way, the pole (4) to the support element (2), wherein the support system (1) comprises a retaining element (16) configured to connect the pole (4) and the connecting element (5) in such a way that the pole (4) is constrained to the connecting element (5) along a longitudinal axis (9) and is selectively rotatable with respect to the connecting element (5) about the longitudinal axis (9).
