Abstract (en)

The invention relates to a base paper for producing a multilayer product, such as laminate structure. The base paper comprises cellulosic fibre material and has a bulk density value $\leq 590 \text{ kg/m}^3$; a Bendtsen roughness value $\geq 800 \text{ ml/min}$; and a Gurley porosity value $\leq 15 \text{ s/100 ml}$. The invention further relates to a use of the base paper and to a multilayer structure.
