Abstract (en)

The present invention relates to a novel cladding fastener, comprising an elongated spike (7), a sleeve (8) having a body (17) and a flange (13) extending to the side from the body (17), and wherein the first end (11) of the spike (7) comprises a form lock (14) for attaching to the concrete frame (3) of the concrete element (1). The cladding fastener further comprises a spacer (9) and the second end of the spike (7) is provided with connection means (15) for attaching to the sleeve (8) and connection means (8) for attaching to the spacer (9). The spacer (9) is provided with connection means for attaching to the spike (23) and a fastener for grip (24).
