Abstract (en)

The present invention pertains to a splash guard arrangement for a door. Sufficient ventilation is required in wet spaces, such as bathrooms. However, the gap between a door and a threshold may cause damages to hidden interior structure of buildings and to floor construction. A splash guard arrangement (100) according to the present invention is arrangeable in an open space (102), which is arranged in a door (104). It comprises an elastic member (106) protruding from the open space (102), and at least one fixing means (108) for fixing the elastic member (106) in the open space (102) so that enabling ventilation via the open space (102).
