Abstract (en)

An oven tray (100) can be cooled whilst in an oven (10). An input is received from a user at the oven (10) to initiate cooling of the oven tray (100) which is located in the oven (10). Following receipt of the user input, a cooling fluid is passed through at least one pipe (108, 30) which is located on or in thermal contact with the oven tray (100) to cool at least a portion of the oven tray (100). The cooling pipe (108, 30) may be provided on the oven tray (100) or within the oven (10).
