Abstract (en)
[origin: WO2021019032A1] The invention relates to a bristle carrier clamping holder for receiving and positioning a bristle carrier (12), which is transported through processing stations with the bristle carrier detachably secured thereon, wherein said bristle carrier clamping holder is provided with a receiving means (22) for the bristle carrier (12), which has a lower pretensioning device (42) and multiple upper stops (26), wherein the pretensioning device (42) presses the bristle carrier (42) against the stops (26) from below and the pretensioning device (42) has multiple locally spaced-apart contact points (46, 50) which are pretensioned separately in groups or each pretensioned separately and which press against the bristle carrier (12).
