Abstract (en)

[origin: WO2021018591A1] The invention discloses a lid device (100) for a vessel (20) of a food processor, a vessel/lid-device combination (1) for a food processor, and also a food processor. The lid device (100) comprises a cover (110) for the vessel (200), a swing-action device (120) and a seal (130) with a lip (131). When the seal has been fastened in the envisaged manner on the cover, the lip (131) projects from the cover, in particular in the region of the swing-action device (120). When the swing-action device (120) has been swung closed, the lip (131) then projects at least to some extent into the vessel (200) and extends along the wall (210) thereof.
