Abstract (en)

[origin: WO2021013484A1] The invention relates to a transport device (1) for transporting a person, comprising a preferably concave support surface (S) which extends longitudinally and on which a person (20) can be transported, the support surface (S) having two lateral edges (230), and comprising two longitudinal ends (210), the device (1) further comprising grippable means (5) for gripping the device (1), and at least one coupling between each of the grippable means (5) and each of the longitudinal ends (210), the device (1) being characterized in that the coupling comprises at least two coupling points, including at least one pivot.
