Abstract (en)

[origin: WO2021013488A1] The invention relates to a method for producing a finished strip (6) from steel in a combined casting/rolling installation (1) and to a combined casting/rolling installation (1) suitable for this purpose. The object of the invention is to find a method by which a thin finished strip (6) with good deep-drawing properties and high surface quality can be produced directly on a combined casting/rolling installation without the need for the finished strip (6) to be pickled and cold rolled after hot rolling. This object is achieved by the method according to claim 1.
