Abstract (en)

[origin: WO2021083675A1] The invention relates to a sheet processing machine (01) with at least one sheet storage device (701), wherein the at least one sheet storage device (701) is arranged below a utility separator (501) in the vertical direction (V), and the at least one sheet storage device (701) is arranged in an adjustable manner at least in a retraction direction (E). The at least one sheet storage device (701) comprises at least one horizontally adjustable sheet storage means (705) and a storage element (703) which can be adjusted relative to the at least one sheet storage means (705).
