Abstract (en)
[origin: WO2022078801A1] Noseband pad to be attached to the noseband on a side facing the animal, in particular horse, said noseband pad comprising an elongate flexible main part with a first end portion, a second end portion and a center portion between the two, the center portion being arranged so that it rests against the nasal bone, and the center portion being of the sandwich type with an internal mesh structure of interlaced mesh members between the upper and lower face, resulting in elastic flexibility.
