Abstract (en)
[origin: WO2021013454A1] The invention relates to a machine for manufacturing or processing a material web (9), in particular a paper, cardboard, or tissue web, said machine comprising a pressing unit having a press roll (1) and a counter-press roll (8), wherein the press roll (1) is mounted on a pivotable mounting lever (12) and can be moved by means of at least one adjusting unit (14) between an operating position in which the press roll (1) is pressed against the counter-press roll (8) and an inoperative position in which the press roll (1) is not pressed against the counter-press roll (8), characterised in that the pressing unit is a double pressing unit and the press roll (1) mounted on the pivotable mounting lever (12) is arranged as a second press roll (1) in the web running direction of the material web (9).
