Abstract (en)  
[origin: WO2021019382A1] A water delivery system (900) connectable to a hydraulic network comprising a mixing and regulation device (910), a delivery device (920), e.g. a tap, and an installation device (1) installable inside a wall and fluidically connectable to a cold water pipe and to a hot water pipe. Said mixing and regulation device (910) comprising a mixing cartridge (911) and a command linkage (912) engageable to said mixing cartridge (911). Said installation device (1) comprises a mixing and regulation chamber (31) provided with a front mixer opening (310) in which the mixing cartridge (911) is at least partially insertable and a delivery chamber (32) provided with a front delivery opening (320) into which the delivery device (920) is at least partially insertable, in which said chambers are fluidically connected by a conduit (35) which extends along an axis (X-X). In particular, the mixing cartridge (911) is insertable into the mixing and regulation chamber (31) in a plurality of angular positions.
