Abstract (en)
[origin: WO2021020970A1] An insulating glass unit (1) for use in an insulated building structure (100), a building structure including the insulating glass unit (1), and a method for using the insulating glass unit in the building structure, the insulating glass unit (1) comprising at least one panel (10, 10'), the panel or each of the panels comprising at least two panes (3) that are spaced apart by means of at least one endless spacer bar (5) placed between the panes (3). In an insulating position of use in a building structure (100), an extent of the panel or each of the panels (10, 10') is of such a size that at least one of the at least one spacer bar (5) overlaps or is overlapped by an insulating portion (104, 105, 105') of the building structure (100) on a plurality of the sides of the insulating glass unit (1).
