Abstract (en)

[origin: WO2021018555A1] A media client (1) for recording interpreted segments (201;202) into a second language of a source segment (101; 102) of a source media (10), configured to: - play back a first source segment (101); - at a first point in time (91), pause said playback of said first source segment (101) and record a first interpreted segment (201) of said first source segment (101); - at a second point in time (92), define an end of first interpreted segment (201) and play back a second source segment (102) of said source media (10) starting from said first point in time (91); and - store data (30) on said first interpreted segment (201) comprising said first point in time (91) and second point in time (92) or a duration (7) of said first interpreted segment (201) between said first and second points in time.
