Abstract (en)

A screening arrangement for a roof window, and a roof window comprising such a screening arrangement. The screening arrangement (50) comprises a screening device (60) and a corner cover assembly (80). The corner cover assembly (80) comprises a first and a second corner cover element (81, 82) each covering an opening in-between a top casing (61) and an adjacent side rail (63, 64) such that an overlap is provided between the corner cover element and the underlying top casing (61) and side rail (63, 64). The bottom surface of each first and second corner cover element (81, 82) is configured to absorb incident light on the bottom surface (821b), preferably by providing the bottom surface (821b) as a surface of dark colour, such as black.
