Abstract (en)

[origin: WO2021025641A2] The present invention relates to a profile processing machine (10) having a processing unit (30) associated with a feeding conveyor (20) and which has at least one tool (327) and at least one cutting unit (50) associated with an output conveyor (80). As an improvement, in order to provide transfer of the profile, processed in the processing unit (30), to the cutting unit (50) as a whole, at least one transfer unit (40) is provided between the processing unit (30) and the cutting unit (50).
