Abstract (en)

[origin: CN212358482U] The utility model relates to a sanitary installation part and a structural series for the sanitary installation part, the sanitary installation part comprises at least one function unit (2) for adjusting the flow and a diffuser (4) arranged behind the function unit (2) for adjusting the flow along the flow direction (3), the diffuser (4) is provided with a diffuser space (5), the diffuser space (5) is defined in part by a collision surface (6) which reverses water flowing into the diffuser space (5) in the radial direction towards the plurality of discharge openings (7), and a flow-away inclination (8) is provided at an angle to the collision surface (6), which causes the water entering the collision surface (6) and flowing away from the collision surface to flow in the direction of the discharge openings (7) in the use position. According to the sanitary installation part, the sanitary installation part with the improved use characteristics is provided.
