Abstract (en)

[origin: WO2021047857A1] The invention relates to a cover unit (24) for a converter head (14) of a high-voltage converter device (10), comprising a flat, preferably even, cover element (26) and an RIV shielding device (28) for shielding radio interference voltage, which RIV shielding device peripherally surrounds the cover element (26). According to the invention, the RIV shielding device (28) is formed by a plurality of RIV shielding elements (34) distributed peripherally on the edge of the cover element (26), which RIV shielding elements each have a substantially cylindrical shape, in particular a capsule shape. The invention further relates to a corresponding converter head (14) and to a corresponding high-voltage converter device (10).
