Abstract (en)

[origin: WO2021089906A1] A method may include receiving, at a user equipment, a broadcast including network range markers data from a network element. The method may also include performing a distance measurement of the user equipment to the network element. The method may further include determining, according to the network range markers data and the measured distance, a sector of a cell coverage area at which the user equipment is located.
