Abstract (en)

Remote control device (10), of the portable and wireless type, configured to command one or more electric actuation devices (43, 45, 47) of an apparatus (12), for example a pergola. The remote control device (10) comprises a microprocessor with which there are associated a magnetometer and an accelerometer to detect the angular position in space of the remote control device (10) and consequently command the electric actuation devices (43, 45, 47) of the apparatus (12).
