Abstract (en)
[origin: WO2021151407A1] The invention relates to a tool holder having a detachably fastened cutting insert and a coolant supply in a clamping cover (10), which has at least one outlet opening (12, 13, 14, 15, 16), through which a coolant jet is directed under a pressure of at least 3×10^5 to the active cutting edge of the cutting insert. According to the invention, the cross-section of the outlet opening (12, 13, 14, 15, 16) has a plurality of constrictions.
