Abstract (en)

[origin: WO2021023368A1] The invention relates to an OCT system (1) comprising an optical coherence tomograph (5) for recording a height profile (28) of a workpiece surface (2) by optical scanning of the workpiece surface (2). According to the invention, the OCT system comprises a camera (4) for capturing an image (23) of the workpiece surface (2) and a display (24) for the joint, in particular superimposed display of the captured image (23) and the recorded height profile (28) of the workpiece surface (2).
