Abstract (en)

[origin: WO2021028638A1] A rear deflector (DR) is fitted to a wheeled vehicle comprising a structure (SV), having a rear panel provided with N first fastening tabs, and a rear bumper (PCR) comprising N second fastening tabs (PF2). This rear deflector (DR) comprises a rear edge (BR) having N regions against which there bear, on an underside (FI), the N second fastening tabs (PF2) and which are provided with N holes which, just like the first and second (PF2) fastening tabs, are traversed by N screws securely fixing the rear bumper (PCR) to the rear deflector (DR) and the latter to the rear panel. This rear edge (BR) also comprises on its underside (FI), in each of the N regions, a housing (LP) comprising a hole and guiding the positioning of, and housing, one of the second fastening tabs (PF2).
