Abstract (en)

[origin: WO2021093893A1] According to an embodiment of the present disclosure, there is provided a method for performing channel access procedure, in a communication system comprising a terminal, UE, and a base station, BS, communicating in a shared spectrum. The method comprising the following two steps of sending, by a BS to a UE, a first information including information indicative of channel occupancy time, COT, of the BS and performing, by the UE, channel access procedure of a first type or channel access procedure of a second type, based on at least the first information, to perform an uplink transmission.
