Abstract (en)

[origin: EP4015917A1] Hanging system for an extractor hood (1) comprising a frame structure with profiles (4, 11, 13) for supporting an extractor hood (1) and comprising hanging cables (2) for hanging the frame structure from an overlying structure, wherein the hanging system comprises, for each hanging cable (2), an encasement profile (5), wherein each hanging cable (2) is connected to the frame structure and at least partially extends through a passage (20) of the respective encasement profile (5) and that each encasement profile (5) is coupled by an end to the frame structure and this is achieved with the aid of a coupling piece (6) that allows movement between the encasement profile (5) and the frame structure between a rest position of the hanging system and one or more other positions.
