Abstract (en)
An appliance that could incorporate a refrigerator, hot and cold ventilation. It may use a limited amount of electricity or several other forms of energy, for the performance of the embodiment. It will not require installation as with air-conditionings or like most of the presently heating and cooling systems in use. The embodiment has the capability to operate as a split system air-conditioner, or just like a heater or to provide forced ventilation, or by the combination of all-in-one unit, as shown in Drawing 1/8. It had the capability to use several kinds of energy, especially suitable for some remote areas.
