Abstract (en)

This disclosure provides a method for reporting state information, a terminal, and a network device. The method for reporting state information includes transmitting state information, by the terminal, of a handover procedure to the network device, where the state information of a handover procedure includes at least one of the following: random access procedure state information corresponding to a handover target cell of the handover procedure; connection failure information corresponding to a handover target cell of the handover procedure; and RLF information in the handover procedure.
