Abstract (en)

[origin: WO2021034474A1] A delivery system comprises a sheath having an outer tube surrounding a hollow interior and a dilator configured to fit at least partially into the hollow interior of the sheath. The dilator comprises a distal portion configured to at least partially dilate a blood vessel, a middle portion, a proximal portion, and an inner lumen extending through the distal portion, middle portion, and the proximal portion.
