Abstract (en)
[origin: WO2021037665A1] The invention relates to a membrane pressure switch (1) having a housing (2) in which there is arranged a deformable membrane (3) against which there bears a thrust pad (4) that can be displaced by the deformation of the membrane (3); and having a microswitch (5) which is arranged facing the thrust pad (4) in the housing (2) by means of a securing plate (6), wherein the securing plate (6) is provided with an external thread (7) which, when the securing plate (6) is in its mounted state, is screwed into an internal thread (8) of the housing (2).
